FACT SHEET

WORKFORCE ANALYTICS

Aurion Analytics provides highly optimised tools for business analysis and intelligence. Using Aurion Analytics, you can build a full picture of the key HR and payroll metrics within your business and support workforce management initiatives across key business systems.

Aurion Analytics provides interactive payroll and HR dashboards displaying historical, current and forecast information. Track your corporate key performance indicators with visually stunning maps, graphs and tables. Assign goals and collaborate on the metrics that matter to you.

With a few clicks, you can filter a range of business metrics to change your view of, and better understand your workforce.

Aurion Analytics includes a high performance datamart providing historical, current and forecast information optimised for business intelligence.

The Aurion Analytics datamart powers our interactive dashboards, and can be integrated to other external business intelligence and workforce management tools to support strategic planning across multiple business systems within your business.

BENEFITS

- + Gain full visibility of critical people data
- + Track key metrics against your defined targets to ensure full compliance and cost reduction.

- + Access pre-configured dashboards that are ready for your business with minimal setup configuration.
- + Customise dashboards to the needs of your business - Aurion Analytics provides a highpowered data analysis and visualisation layer which can be used to build custom reports and dashboards.

KEY FEATURES

Unlock insights, right out of the box

Aurion Analytics gives your organisation preloaded people and payroll dashboards and metrics. Now your organisation can quickly gain valuable insights from your HR metrics, uncover trends and visualise key performance indicators.

View vital workforce metrics including:

- + Diversity - gender, workforce participation/representation against targets
- + Headcount and turnover against targets
- + Movements in, out and within your organisation
- + Leave analysis including absence analysis against targets.

Build your own custom dashboards and reports

As every business is different, Aurion Analytics provides a data analytics and visualisation layer which can be used to draw data from the Analytics datamart into custom reports and dashboards. Reports and dashboards can be built by your BI specialists or we can provide expert BI consulting services to support you.

WORKFORCE ANALYTICS

Aurion Datamart

Aurion Analytics is powered by the Analytics datamart – an Analytics-specific data schema including current and historical data required for complex data analysis

The Analytics datamart includes highly optimised data for business intelligence which can be used with Aurion Analytics preconfigured dashboards and customer tools, or integrated with external business intelligence and workforce management tools to support strategic planning across multiple business systems within your business.
